

ABSTRACT OF THE DISCLOSURE

When detecting that a display unit (3) of a vehicle-mounted display device (2) mounted to a vehicle ceiling (1) is placed in a use state 3a, a display unit opening and closing detector 101 sends out a use detection signal. A
5 lighting control circuit (102) limits light emitted out of an indoor lighting device (6) and incident upon the screen of the display unit (3) according to the use detection signal from the display unit opening and closing detector (101).
